Lighthouse movie trailer

Watchmen | Warner Bros. A good trailer doesn't always make a good movie. Since trailers usually run between one to three minutes, it's easy to cut together something that for that time looks patently stunning, but when extended out to an all-movie is godly - so many moviegoers who went to see Suicide Squad discovered. With the rise in popularity of trailers in recent years, it is only natural that someone will end up with movies that fall far below our expectations. But hey, who doesn't like a good trailer even after the fact? 1. Watchmen (2009) Despite earning a middling 65% rating on Rotten Tomatoes, the filmadaptation of the popular graphic novel was considered a disappointment. The driving time is up around almost three hours and has an end that represents a large diversion from the source material. All that aside, director Zack Snyder gives us a visual feast, giving everyone cutting together a trailer a treasure trove of usable footage. The trailer is unabashedly cool, giving no indication of the relative disappointment to follow in theaters. 2. Green Lantern (2011) In 2011, the DC Comics series began to build steam after the 2008 release of The Dark Knight. Ryan Reynolds as Green Lantern should be the next step into the age of Marvel-esque success. Instead, Green Lantern was an unemming disaster, setting back the studio's franchise plans for years. It checked in at 26% on Rotten Tomatoes, making back barely half of its giant \$200 million budget (figures also from Rotten Tomatoes). You wouldn't have guessed that this would happen based on the first three-minute teaser, though. In it we see Reynolds crack wisely in a recognizable green getup with short trips to the finest parts of space interspersed throughout. Oh, what could have been. 3. Star Wars: Episode 1 - The Phantom Menace (1999) It had been almost 20 years since the last Star Wars film when The Phantom Menace was released in 1999. At the time, a generation of sci-fi fans were brought up on the franchise, spending almost their entire childhood waiting for the next film. So needless to say, when the trailer first fell for The Phantom Menace, people went a little crazy. What they got on the film's release was something of a mess, which made many feel as if George Lucas had lost his mind. We were all equally excited about the trailer for The Force Awakens, and luckily we weren't disappointed with the film this time. 4. Man of Steel (2013) Will we ever get another good Superman movie? When the first teaser of Zack Snyder's Man of Steel came out, it really seemed like we wanted to. It gave us just enough to get excited about, showing us Clark Kent's decidedly human side and more than just the blue-and-red suit. But then came the playing movie, and what we saw was a new Superman with the same old problem: How do you portray an almost indestructible and moral hero in a and nuanced light? Unfortunately, Snyder failed to answer that question, which gave us another subpar run on Man of Steel. I hope Wonder Woman isn't another disappointment. 5. Terminator Salvation (2009) Each rebooted franchise has one thing in common: The one movie that was so bad, it made the studio scrap everything and try again. For Terminator, that film was the ironically titled Terminator Salvation. In the run-up to the release, it seemed like such a good idea. Christian Bale played the role of John Connor with Bryce Dallas Howard and Sam Worthington for all intents and purposes should have worked. At 33% on Rotten Tomatoes, though, it unfortunately didn't. The rebooted Terminator Genisys came out in 2015, and unfortunately our hopes were dashed again. 6. Sucker Punch (2011) It seems that Zack Snyder fails to stay off this list, checking in with Man of Steel, Watchmen, and now, Sucker Punch. What really tells us is that Snyder is skilled at making movies that look good but lack substance. Sucker Punch is the perfect example of this, with some absolutely amazing special effects, but ends up tragically light on character development. Rotten Tomatoes gave it a less-than-stellar 23% rating, reporting only a \$36 million box office haul that fell well short of making back its \$82 million budget. 7. Suicide Squad (2016) Things seemed so damn promising after the release of Suicide Squad's first trailer. It had it all: witty banter, stylized action, and even the Queen's classic Bohemian Rhapsody as backing tracks. It was a trailer so well received, that the company that cut it together was eventually tasked with cutting the entire film for Warner Bros. Many argue that this was the film's fall, which led to a scattered and frenetic end product. It's not often we see a fantastic trailer that directly contributes to a bad movie, but Suicide Squad managed to achieve just that. 8. Cloverfield (2008) Back in 2008, Cloverfield represented the final straw for people's patience with the found recording genre. While an interesting concept on the surface, there was little denying that watching a shaky-cam sci-fi movie with little resemblance to stage building or history doesn't play well over two full hours. Nevertheless, the trailer for the film was a rousing success, namely because found footage is amazing in two-minute sprints. That's when you start expanding into feature movies where problems arise. 9. The Hobbit: An Unexpected Journey (2012) Peter Jackson's The Lord of the Rings saga is iconic in cinema, as one of the most compelling and broad fantasy trilogies of all time. It's The Hobbit where things went wrong for the talented director, as he tried to push a 300-page book into three separate films. It didn't make us any less excited about the debut trailer, which showed us action, adventure and some familiar faces along the way. Oh what could have been ... 10th Tron: Legacy (2010) Tron: Legacy was a those movies that looked absolutely incredible from a visual point of view, but delivered nothing in the way of an interesting or nuanced story. Even with Jeff Bridges returning to play his original character, the film couldn't quite measure up to the sky-high expectations set by the killer trailer. Follow Nick on Twitter @NickNorthwest Check Out Entertainment Cheat Sheet on Facebook! Watching movie trailers gives you a glimpse of what a movie is all about before you see it. Below are the best sites to find free movie preview. Most movie trailer sites are very similar, so you'll find everything from the latest movie trailers for upcoming movies to old trailers, handmade lists of the best movie trailers and multiple trailers for the same movie. If you find a trailer for something you're interested in, first check if it's on a free movie streaming site before you pay for it. iTunes Movie Trailers is part of Apple's website that only has movie trailers. The videos are of high quality and the site is free for ads, so it's one of the best places to go for the best movie trailers. You can sort these movie previews by recently added, most popular, exclusive, genre and studio. The search tool allows you to find a movie trailer of actors and director. Most movie trailer sites don't support that many surfing methods, so this is the best option to find trailers for movies you don't even know about yet. The RSS feed at the bottom of Apple's website lets you stay up to date with every new movie trailer they release. Trailer Addict is another site dedicated to movie trailers. There's an All Films page plus other useful sections like Top Films to find the best movie trailers, Coming soon for previews for upcoming movies, Out Now for current trailers and a Tag Browser page to find movie previews by cast, studio or genre. These trailers are also handed out in categories such as Adaptation and Trailer Type, so you can find trailers for remakes or movies based on books, musicals, video games, etc. Each trailer page explains the film, displays screenshots from the trailer, shows the release date, allows for comments and allows you to find similar movies based on genre. With millions of titles and extremely thorough movie information, IMDb is one of the top 100 sites in the world and is a must-visit website for anyone looking for movie trailers. The trailer section of IMDb lets you see previews of the most popular movies and find all the recently added trailers for movies that were just released and others coming out soon. If not for trailers alone, movie lovers should visit IMDb just to see how many details they have on both movies and TV shows. It is one of the best sites to learn who played, or wants to play, in a movie or TV show. Another way to find the latest movie trailers is FirstShowing.net. Previews include a lot of background information and acting resources, so you can get more of an idea of what the film is about from information. There's also a movie release plan here for this year and next year, so you can watch when movies come out while watching the trailer. Another place to find previews of upcoming movies, trailers from the best box office movies, current movie trailers and more is Rotten Tomatoes. It's easy to browse the movie trailers on this site because they're all on one page. Just find the part you want, such as movies on Netflix, and select an image to open the trailer for that movie. You can also browse movie trailers for when the movie will be in theaters and of the most streamed movies. Sorting and filtering options let you find trailers for movies that have a specific Rotten Tomatoes score, movies in one or more specific genres and movies that are popular or recently added to the site. YouTube is the most popular video streaming site on the web, so it's no surprise that it's one of the best movie preview sites as well. Film production companies and other users can upload movie trailers to YouTube that are free for anyone to watch. Unlike other sites that have movie trailers, youTube does not have a page dedicated to trailers only; they are mixed in with music videos, podcasts, news stations and more. This means that you can't easily find trailers for movies coming out soon or new trailers that were just released. Instead, you can search for any movie trailer you want to watch. There are also channels dedicated to trailers, such as Movieclips Trailers and FRESH Movie Trailers. You can also visit a YouTube channel from a specific media company or production company, such as Warner Bros Pictures or Disney. Get movie preview, insider information and the latest movie gossip on ComingSoon.net, one of the most popular entertainment venues on the web. Not only can you find all sorts of movie trailers, you also get first dibs on insider gossip, speculation about upcoming movie plots, actor and acting information, and much more. One drawback of this movie trailer site is that you can only browse the trailers page of those that were just added and by a category called Exclusive. It's a search tool and a page full of movies, but none of them will guarantee you'll find trailers. Thank you for telling us! Tell us why! Why!
